LUCAS KOTVISKI FIALA

Product Designer Sr (UX/UI)

Curitiba, PR - Brazil • +55 (41) 988-899-884 • efialalucas@hotmail.com

SUMMARY

UX/UI and Product Designer with 10 years of experience designing digital products, complex and scalable platforms. I combine UX strategy, visual design, and product thinking to turn complex problems into clear, and intuitive experiences. Experienced in working across B2B products, AI-powered solutions, and multidisciplinary teams, from discovery and prioritization to prototyping, delivery, and continuous improvement. I focus on aligning user needs, business goals, and technical constraints to deliver meaningful product outcomes.

CORE STRENGTHS

Product Design • Discovery • UX Research • Design Thinking • Interaction Design • Design System • Workflow • Prototyping • AI-Powered Products • Accessibility • Figma • Scrum/Kanban • English

PROFESSIONAL EXPERIENCE

Product Designer Sr. — Global Hitss *2023 – 2026*

- Led UX/UI projects and Proofs of Concept (POCs), translating business goals, user needs, and technical constraints into scalable product experiences.
- Created roadmaps and conducted benchmarking to support prioritization and reduce uncertainty, improving planning efficiency by 25% and reducing rework across user journeys and features by 50%.
- Developed visual identities and Design Systems that establish consistent patterns across products while supporting scalability and efficient implementation.
- Collaborated closely with Product, Engineering, and business stakeholders, aligning priorities, communicating risks, and guiding design decisions throughout the product lifecycle.
- Applied Agile practices to structure design workflows, improve visibility across deliverables, and support predictable collaboration with multidisciplinary teams.

UX/UI Designer Pl. — United Nations | UNICEF *2022 – 2023*

- Led the UX/UI design of the first digital monitoring platform for the Selo UNICEF program, centralizing information and workflows for UNICEF agents, public managers, schools, and health professionals.
- Translated complex program requirements into role-based journeys, intuitive workflows and interface structure.
- Conducted iterative Discovery and stakeholder alignment across multiple UNICEF teams, validating requirements and design decisions throughout the project.
- Created a unified Design System to support consistency and scalability across the platform and related projects.

UX/UI Designer — Electrolux *2021 – 2022*

- Planned and executed an internal machine-reading project, providing direct support to the development team.
- Designed an intuitive interface for low-resolution displays, improving user team satisfaction based on feedback.

Marketing, SEO and Designer Sr. — Solo Network *2020 – 2021*

- Coordinated digital campaigns and products, including websites, landing pages, and social media presence.
- Implemented SEO strategies, reducing reliance on paid advertising by 15% and increasing organic traffic by 50% within six months.
